Automated Wireless Environments, Inc. delivers industry-specific enterprise-wide petroleum management software solutions to the energy industry. Our applications offer superior usability and empower your employees with the tools they need to manage your enterprise. For over 40 years, we have maintained focus on consistently creating software and technology solutions that increase operational efficiency, enhance productivity and, most importantly, help to increase revenues and cut down operational costs. All systems are bilingual and can be purchased separately.

At the core of our technological offerings is the ***E-System enterprise management software*** platform that helps to manage your enterprise. E-System together with our state of the art suite of wireless software products including ***Metered Delivery, Fleet Fueling, Field Service, and Transport*** create a truly automated and wireless environment with real-time connectivity to your field force, delivering mission critical data to and from the supply chain, helping you to successfully manage & control your entire operation from your desktop.

Your Fleet Fueling customers can access delivery information by vehicle, real-time on the Web.

Through our industry leading software and technology solutions, leading marketers, distributors, retailers and services companies across North America are growing their businesses with greater profitability. The AWE platform, using Microsoft Windows, Windows Mobile, Android , and SQL, is a proven technology partner. This has been achieved by helping customers realize the benefits of utilizing technology providing innovative products and solutions. We stand on the foundation that our solutions provide true results and consistently deliver and increase operational efficiency to our customers. Contact us today and learn how we can automate your environment.
